DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 27-31, drawn to the alignment of transmitted/received signals in a space division wireless system, classified in class 398, subclass 129.
 - II. Claims 33-35, drawn to the structure of the transceiver of a free space device, classified in class 398, subclass 135.
 - III. Claim 36-43, drawn to a method of communication between a base station and a specific terminal with details of signal/noise ratio, classified in class 398, subclass 41.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions I, II and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as the details of the angle of the transmitter is not required for the inventions II and III. Invention II has separate utility such as the details of the receiver and the intensity of each terminal is not required for the inventions I and III. Invention III has separate utility such as the details of the method of communicating between the base station and a specific terminal is not required for the inventions I and II. See MPEP § 806.05(d).

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
4. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II and III, restriction for examination purposes as indicated is proper.
5. Claims 26 and 32 link(s) inventions I and II. The restriction requirement between the linked inventions is subject to the nonallowance of the linking claim(s), claims 26 and 32. Upon the allowance of the linking claim(s), the restriction requirement as to the linked inventions shall be withdrawn and any claim(s) depending from or otherwise including all the limitations of the allowable linking claim(s) will be entitled to examination in the instant application. Applicant(s) are advised that if any such claim(s) depending from or including all the limitations of the allowable linking claim(s) is/are presented in a continuation or divisional application, the claims of the continuation or divisional application may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Where a restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. *In re Ziegler*, 44 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

Art Unit: 2633

6. If the applicant elects invention I above, claims 26-32 will be examined. If claim 32 is found allowable, then claims 33-35 would be joined. If claim 32 is rejected, the claims will not be rejoined.

If the applicant elects invention II above, claims 26 and 32-35 will be examined. If claim 32 is found allowable, then claims 27-31 would be joined. If claim 32 is rejected, the claims will not be rejoined.

7. If the applicant elects group III, claims 36-43 will be ^{examined}~~rejoined~~.
